Objet: Consultation in accordance with Espoo Convention regarding Doel 1 and 2

Answers from Sweden to the consultation in accordance with Articles 4-5 of the Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention) regarding the decision to keep the Doel 1 and 2 nuclear power plants operating for a further ten years.

Sweden received an Environmental Impact Assessment (EIA) from Belgium to participate in consultation under Articles 4-5 of the Espoo Convention in relation to the decision to keep the Doel 1 and 2 nuclear power plants operating for a further ten years. Belgium has fulfilled their responsibility following from article 4-5 of the Espoo Convention by providing the Swedish environmental protection agency (EPA) with a notification regarding the project. The Swedish EPA has in turn invited Swedish government agencies, organizations and other parties to give consultation comments on the EIA.

The EIA have been circulated for consideration to 2 central-government agencies and 3 non-governmental environmental organizations during the period from 14th of May 2021 to 29th of June 2021. The documents have also been available on the Swedish EPA website www.naturvardsverket.se/Esbo. None of the agencies or organizations gave any consultations comments on the EIA.

Regards, Sara
